This report provides health and wellbeing evidence from the Oxfordshire Joint Strategic Needs Assessment (JSNA) for Didcot.

Reports and related information for the full Oxfordshire Joint Strategic Needs Assessment is available on the Oxfordshire Insight website at <http://insight.oxfordshire.gov.uk/cms/joint-strategic-needs-assessment>

1 Summary

Population

- According to the ONS mid-year population estimates, the population of Didcot increased from 24,373 in mid-2009 to 27,426 in mid-2019. This growth - over a ten-year period – was an apparent increase of 3,053 people or +13%.
- Over this time period, 2009 and 2019, the population of Didcot aged 15-19 and 40-44 declined by 18% and 24% respectively, while the number of people aged 70-74 has increased by 27%.
- At the time of the 2011 Census survey, Didcot had a similar proportion of residents from an ethnic minority background compared with the wider district, but a lower proportion when compared with the county and national figures (9% for Didcot vs 9% in South Oxfordshire, 16% in Oxfordshire, and 20% in England).
- As of October 2020, there was one care home within Didcot with 61 beds.

Deprivation and children in poverty

- According to the latest Indices of Deprivation (2019), Didcot was relatively un-deprived. No areas were in the 10% most deprived nationally on the overall index and many areas were in the 10% least deprived. One area of the town (Didcot West 10A) ranked within the 10% most deprived nationally on the *Education, Skills and Training* domain.
- According to joint DWP and HMRC estimates for 2019/20, the Didcot ward with the highest prevalence of child poverty was Didcot South (13%).

Health and wellbeing

- Health indicators for Didcot wards were similar to or better than the England average with the exception of: Incidence of colorectal cancer (SIR / per 100), Deaths from all causes, all ages (SMR), Deaths from circulatory disease, all ages (SMR), Deaths from stroke, all ages, all persons (SMR) and Child Development at age 5 (%).
- The prevalence of depression recorded by each of the three GP practices in Didcot was well above the Oxfordshire Clinical Commissioning Group and England averages.
- Levels of adult physical activity were higher than the national average.
 - According to Sport England's small area estimates, the proportion of people aged 16+ in Didcot (MSOA) who were physically active at least 150 minutes a week was above the national rate, however less than the district and county rates.
- The rate of child obesity at the end of primary school was similar to the national average.
 - for year 6 children (aged 10-11 years) in Didcot South and Didcot West wards, the obesity rates were similar to the district and national averages. The rate in Didcot South ward was above the district average.

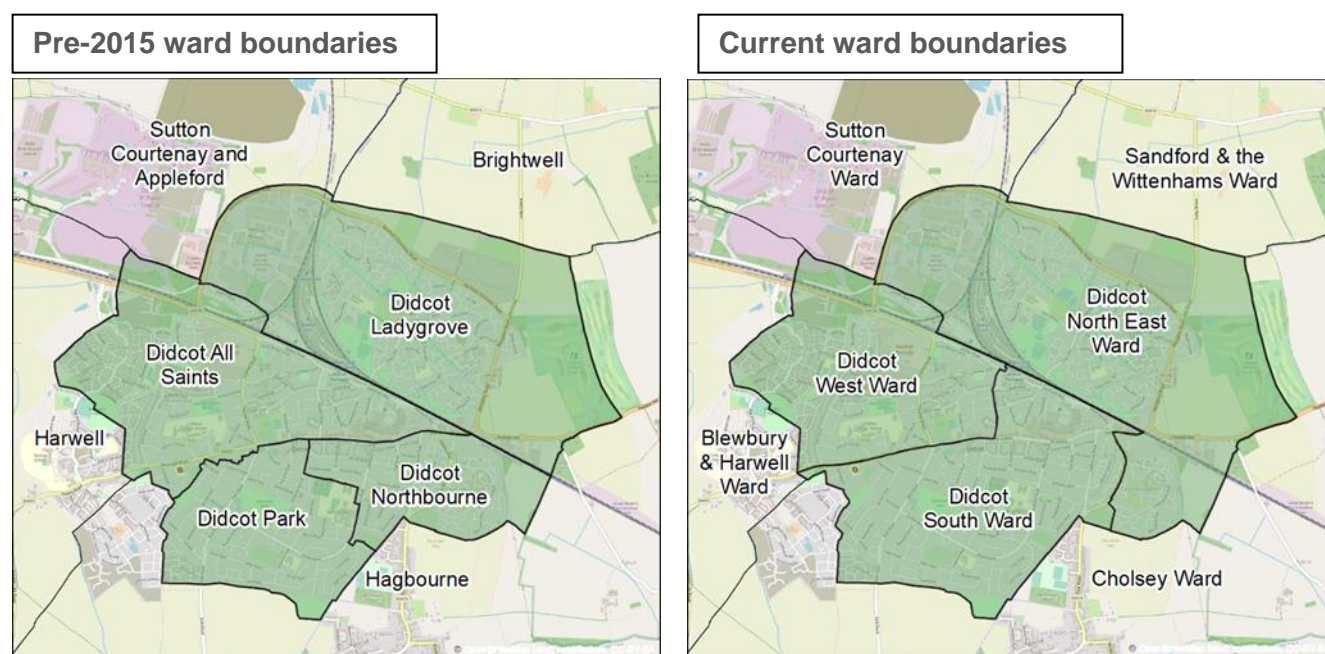

House prices and commuting

- Over the past 5 years (year ending December 2015 to year ending December 2020), the median price for semi-detached housing in 2 areas of Didcot has increased in line with the South Oxfordshire district rate.
- As of the 2011 Census, around 3,799 people living within Didcot travelled to get to work, of which just over a quarter commuted to jobs in Didcot itself.
- The most common other destinations were Oxford (427 commuters), the area to the east of Didcot including RAF Benson (395 commuters) and Reading (166). 159 people living in Didcot in 2011 commuted to London.

2 Geographical boundaries

Data in this profile is reported using several types of geographical boundaries – administrative and statistical.

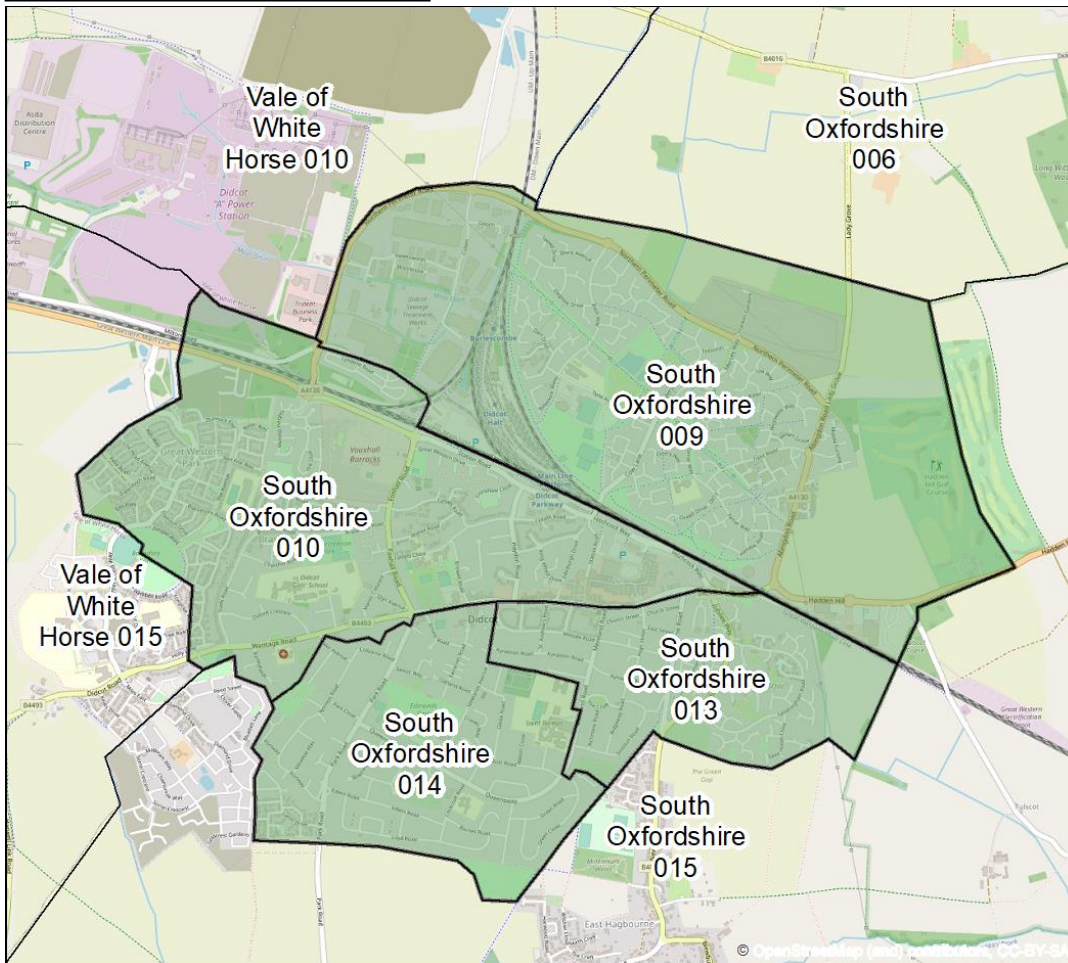

The change to ward boundaries in 2015 reduced the number of wards covering Didcot from 4 to 3: Didcot North East, Didcot West, and Didcot South.

Maps by Oxfordshire County Council

Middle Super Output Areas (MSOAs) are used by ONS to publish Census travel to work data and an increasing range of other social and demographic statistics.

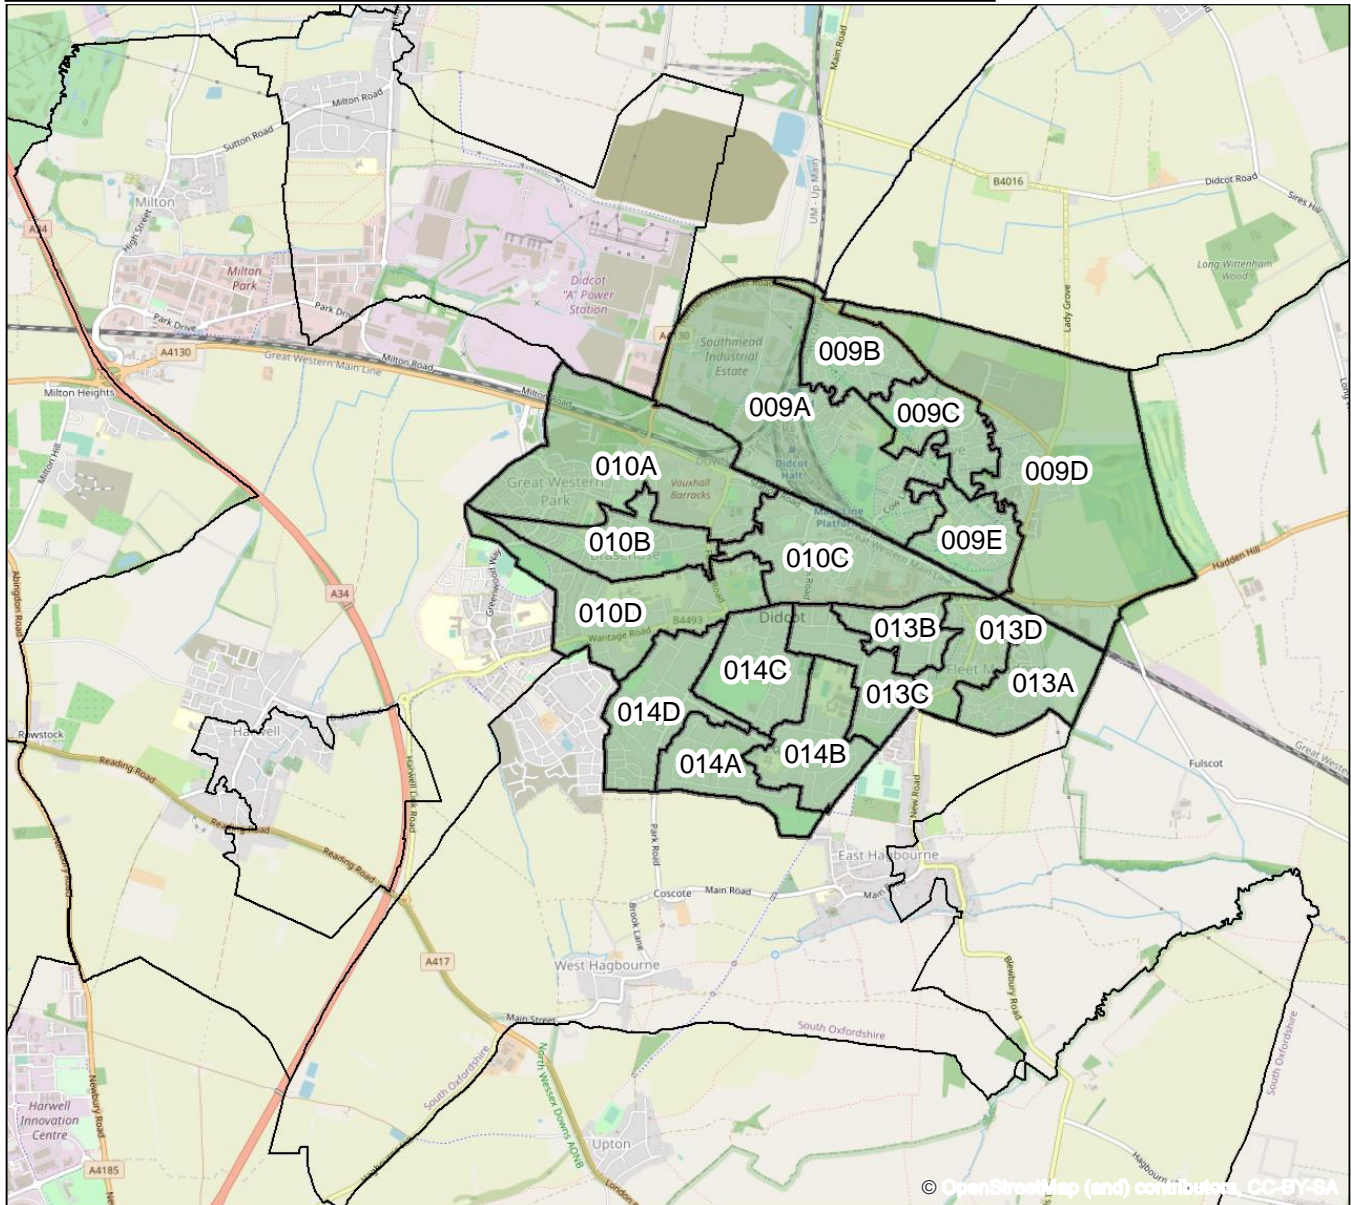

MSOA boundaries

Page 6 | September 2021

Lower Super Output Areas (LSOAs) are used as the geography for publishing the national Indices of Deprivation (IMD). Didcot is covered by a total of 17 LSOAs.

LSOA boundaries (each code is prefixed by 'South Oxfordshire')

Maps by Oxfordshire County Council

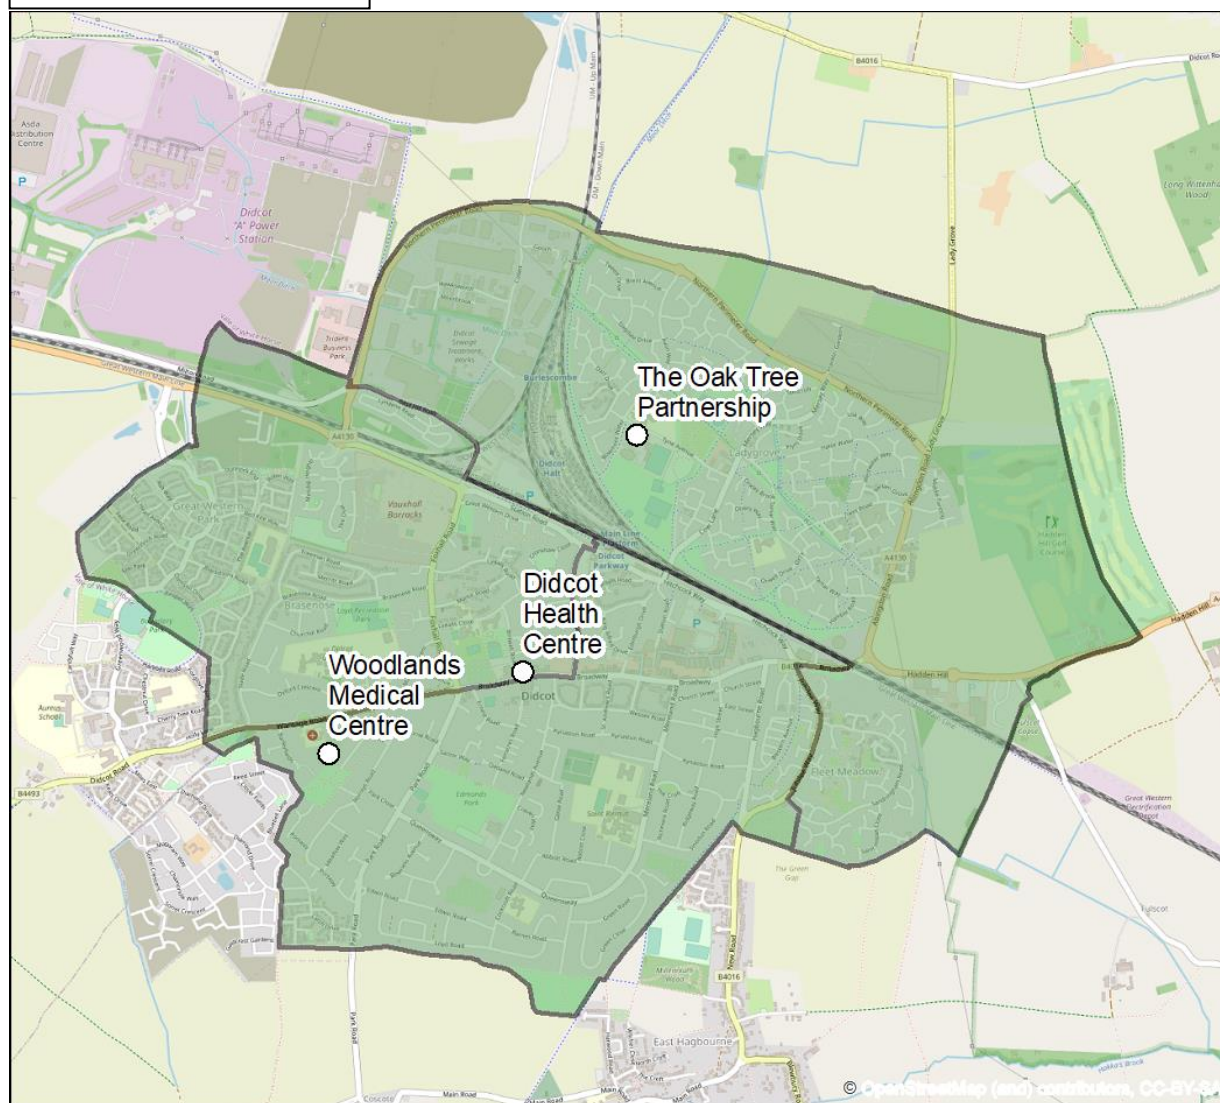

Each LSOA is made up of smaller Output Areas. The main dataset available at Output Area level is the Census 2011 and Census 2001 surveys.

GP data

Data on prevalence of health conditions has been extracted from the Quality Outcomes Framework (to the end of March 2020) for the following 3 GP practices in Didcot:

- Didcot Health Centre
- Woodlands Medical Centre
- The Oak Tree Partnership

GP practice locations

Maps by Oxfordshire County Council

3 Population profile

3.1 Population by age

According to the ONS mid-year population estimates, the population of Didcot increased from **24,373** in mid-2009 to **27,426** in mid-2019. This growth - over a ten-year period – was an apparent increase of 3,053 people or **+13%**.

Over this time period, 2009 and 2019, the population of Didcot aged 15-19 and 40-44 declined by 18% and 24% respectively), while the number of people aged 70-74 increased by 27%.

Figure 1 Population of Didcot (parish) by 5 year age band 2009 and 2019

Source: [ONS mid-year population estimates for parishes based on best fitting of output areas](#)

In mid-2019, the proportion of people in the younger age group (0-19) in Didcot parish was higher compared with the district, county, regional and national average, while the proportion of older people aged 65+ was lower compared with the district average (just above the averages for Oxfordshire, South East and England).

Figure 2 Proportion of residents aged 0-19 and 65+ (2019)

Source: ONS mid-year population estimates (Didcot parish)

3.2 Ethnicity

At the time of the 2011 Census survey, Didcot parish had a similar proportion of residents from an ethnic minority background compared with the wider district, but a lower proportion when compared with the county and national figures (11% for Didcot vs 9% in South Oxfordshire, 16% in Oxfordshire, and 20% in England)¹.

The largest ethnic minority group in Didcot was “White Other” with 1,255 residents, followed by “Asian/Asian British” with 715 residents.

Census 2011 data on country of birth² shows that the largest groups of non-UK born residents in Didcot were from:

- Poland (410 residents)
- Germany (186 residents)
- India (185 residents)
- South Africa (137 residents)

¹ ONS Census 2011 table KS201

² ONS Census 2011 table QS203

3.3 People living in Communal Establishments

The most recent data on people living in communal establishments (such as care homes, boarding schools, halls of residence) is still the 2011 Census.

At the time of the Census 2011 survey, there were 68 people living in Didcot counted as living in a communal establishment out of a total of 7,542 residents (1%).

Of the total of 68 people living in Didcot living in a communal establishment in 2011:

- 61 were people in a Care home with nursing and 3 in a care home without nursing.
- 4 were living in “other” establishment (hotel/guest house/B&B/youth hostel).

Table 1 Count of people living in Communal Establishments: Didcot parish (2011)

	All categories of Communal establishment	Care home with nursing	Care home without nursing	Other

4 Deprivation and Children in poverty

4.1 Indices of Deprivation 2019

Indices of Deprivation 2019

The 2019 Indices of Deprivation (IMD2019) combines measures across 7 “domains” and includes supplementary indices of deprivation affecting children and older people.

According to this latest IMD, Didcot was relatively un-deprived. No areas were in the 10% most deprived nationally on the overall index and many areas were in the 10% least deprived.

One area of the town (Didcot West 10A) ranked within the 10% most deprived nationally on the *Education, Skills and Training* domain.

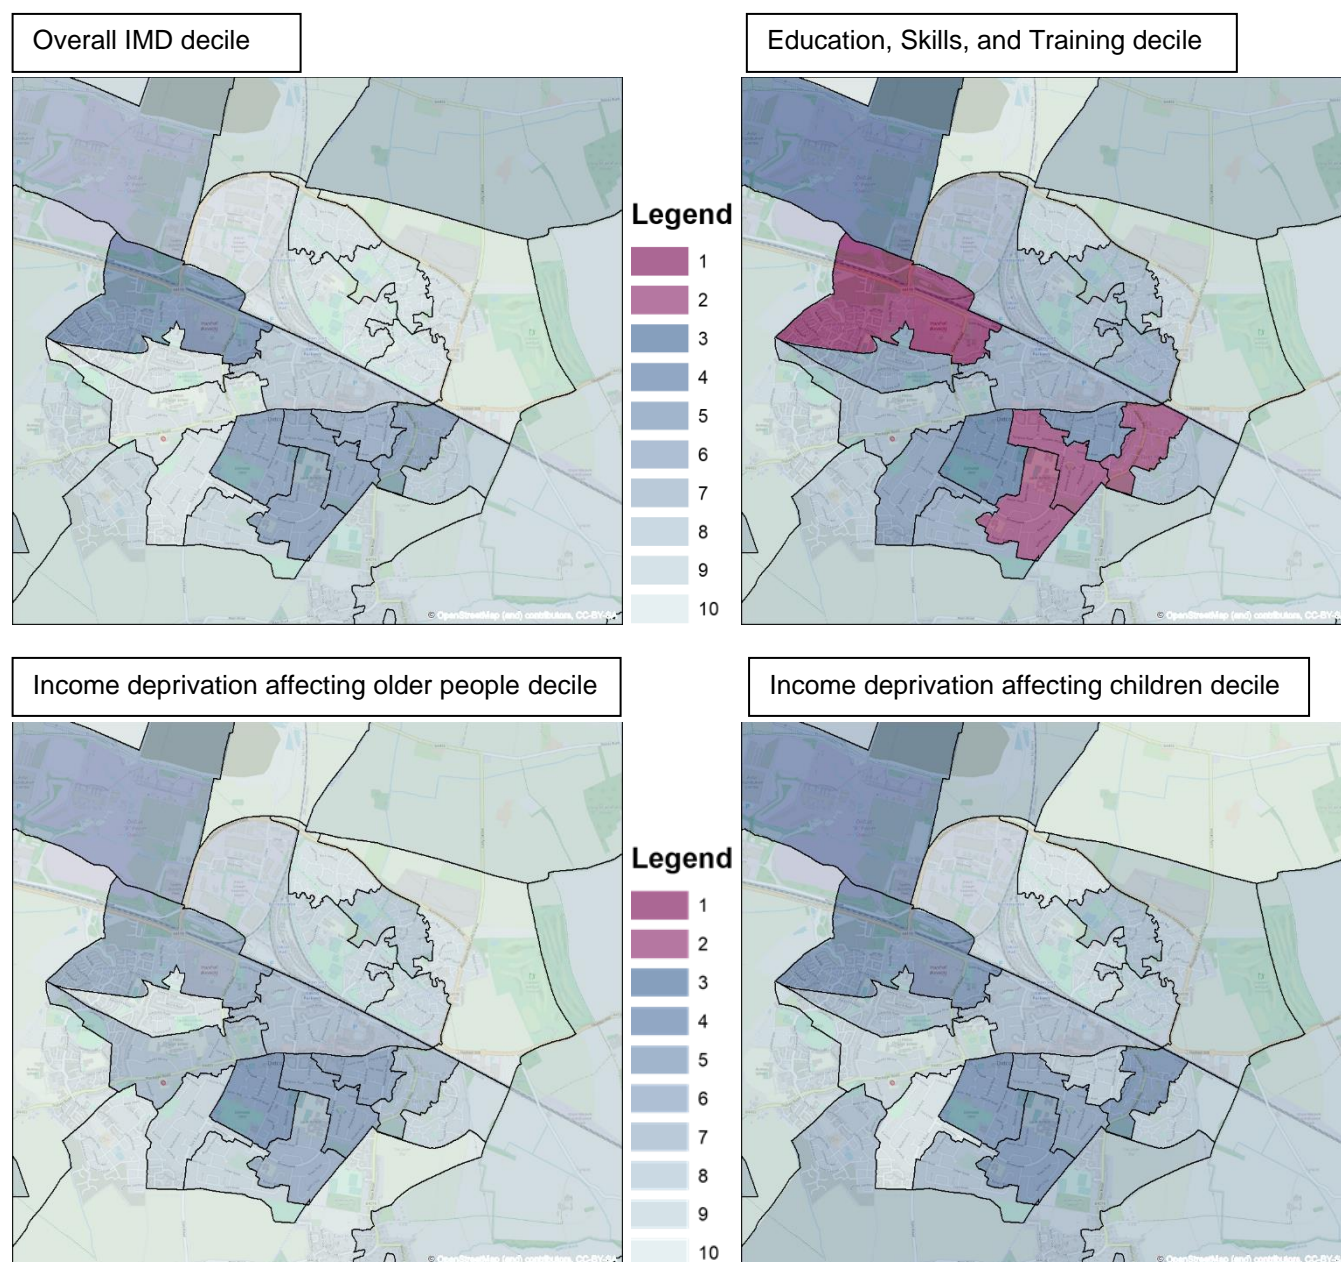

Figure 3 IMD deciles for areas covering Didcot (1 is most deprived decile) sorted on the overall IMD

LSOA area name	IMD	Income	Employment	Education, Skills and Training	Health	Crime	Barriers to Housing and Services	Living Environment	Income Deprivation Affecting Children Index	Income Deprivation Affecting Older People

5.2 Provision of care

Care home beds

As of October 2020, there was 1 care home in Didcot ward with 61 beds³.

People providing unpaid care

The most recent data on people providing unpaid care is still the 2011 Census.

At the time of the Census 2011 survey, there were **647** residents of Didcot parish providing a significant number of hours per week (20 or more) of unpaid care.

Overall the proportion of people providing 20 or more hours per week of unpaid care in Didcot in 2011 was below the county and national averages.

Figure 9 People providing 20 hours or more per week of unpaid care by age as % of resident population (2011)

Source: ONS Census 2011 table LC3304

³ Source: Care Quality Commission, 2020

5.3 Health conditions

Diabetes

The prevalence of **diabetes mellitus** recorded by the three GP Practices in Didcot in 2019-20 were each significantly below the national rate. The rates for Didcot Health Centre and Woodlands Practices were above the Oxfordshire CCG average.

Table 3 Change in prevalence (ages 17+) of Diabetes mellitus (Quality Outcomes Framework) 2018-19 to 2019-20

	2018-19 Count	2018-19 %	2019-20 Count	2019-20 %	change
<i>England</i>	3,319,266	6.9	3,455,176	7.08	+0.18pp ↑
<i>Oxfordshire CCG</i>	31,146	5.05	31,982	5.05	<0.01pp
Didcot Health Centre Practice	857	5.89	875	5.99*	+0.10↑
Oak Tree Health Centre	321	4.23	337	4.36*	+0.13↑
Woodlands Medical Centre	653	6.00	713	5.97*	-0.03↓

Source: NHS Digital, [Quality Outcomes Framework, 2019-20](#)

2019-20 rates with a red asterisk indicate a significantly higher rate for a GP practice compared to the national rate. Green asterisks indicate a significantly lower rate. Tested at a 99.8% confidence level.

Mental health

The prevalence of **dementia** recorded by the GP Practices in Didcot in 2019-20 were each significantly below the national and county averages.

Table 4 Change in prevalence of Dementia (Quality Outcomes Framework) 2018-19 to 2019-20

	2018-19 Count	2018-19 %	2019-20 Count	2019-20 %	change
<i>England</i>	464,860	0.79	474,537	0.79	<0.01pp
<i>Oxfordshire CCG</i>	5,862	0.78	5,821	0.75	-0.03pp ↓

2019-20 rates with a red asterisk indicate a significantly higher rate for a GP practice compared to the national rate. Green asterisks indicate a significantly lower rate. Tested at a 99.8% confidence level.

5.4 Physical Activity and Healthy weight

Physical activity

According to Sport England's small area estimates⁴, the proportion of people aged 16+ in Didcot (MSOA) who were physically active at least 150 minutes a week was on average 67%, just below the district (69%) and county rates (70%) and above the national rate (63%).

Figure 10 Estimated proportion of adults aged 16+ who are physically active at least 150 minutes a week (November 2018-19), South Oxfordshire MSOAs

Middle Layer Super Output Areas (MSOAs) labelled with names to show the area covered

Source: [Sport England Active Lives survey](#), November 2018-19; [map showing MSOAs in Oxfordshire](#)

Note: for Oxfordshire's local authorities, including South Oxfordshire, the Active Lives survey is completed by a minimum of 500 respondents, which is 20-30 people per MSOA. This is too few to derive precise direct estimates.

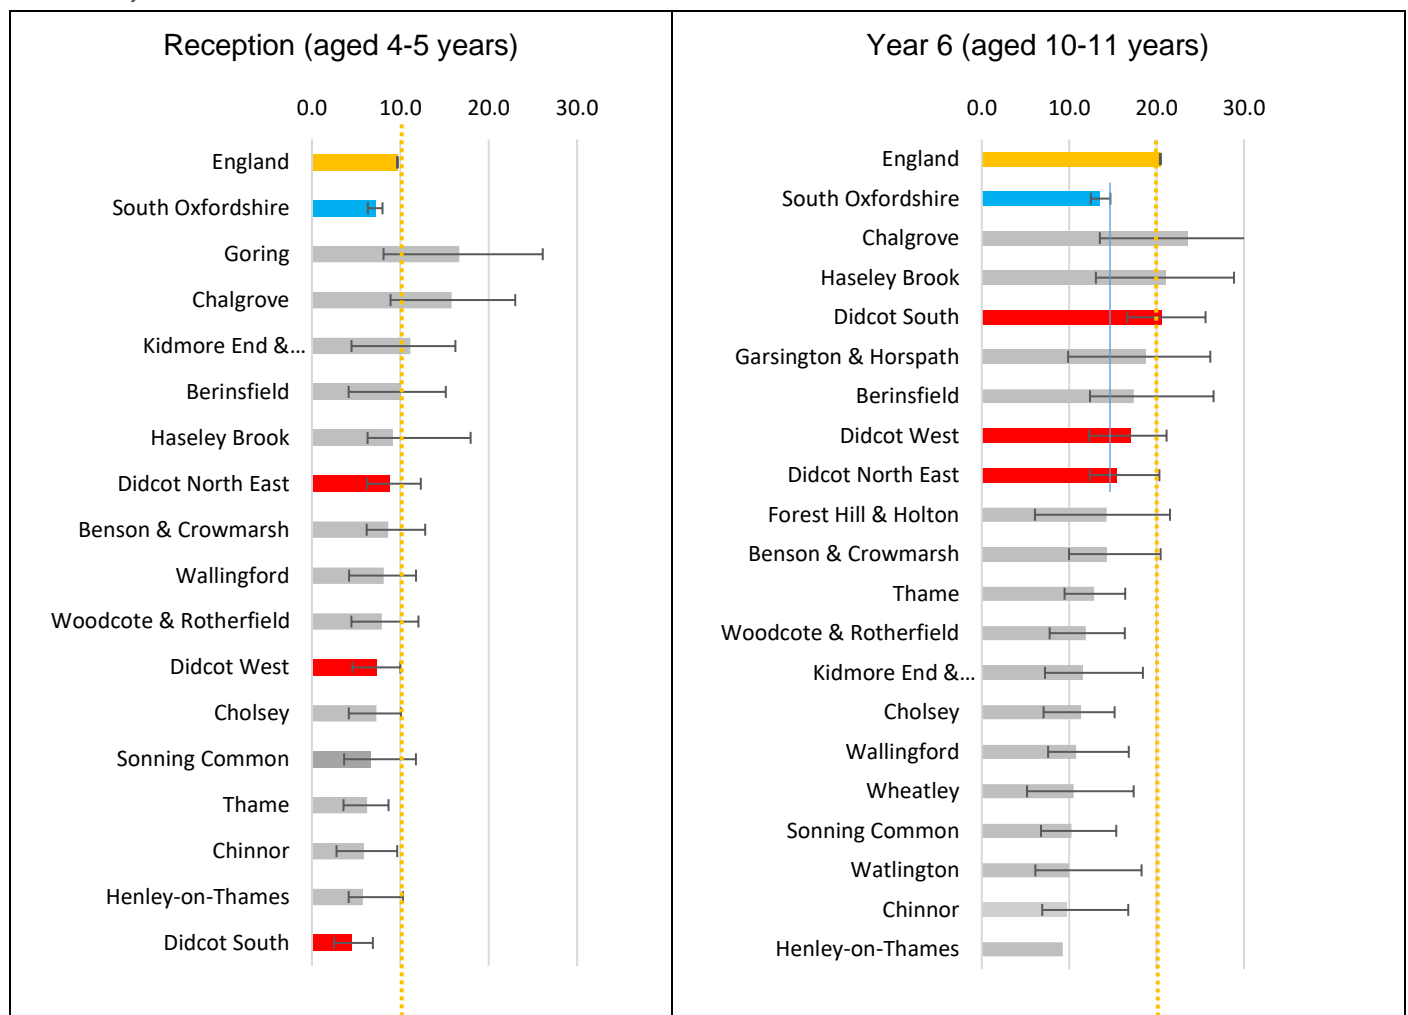

⁴ <https://www.sportengland.org/know-your-audience/data/active-lives/active-lives-data-tables>

Child Obesity

The latest data on child obesity from the National Child Measurement Programme (NCMP, 3 years combined 2017/18 to 2019/20) shows that:

- for reception children (aged 4-5 years), the Didcot West and Didcot South wards were significantly below (better than) the national average, while Didcot North East was similar.
- for year 6 children (aged 10-11 years) in Didcot South and Didcot West wards, the rates were similar to the district and national averages. The rate in Didcot South ward was above the district average.

Figure 11 Prevalence of obesity among children 2017/18 to 2019/20 (showing 95% confidence intervals)

Source: [National Child Measurement Programme](#)

Trend data shows that the 3-year average rate of year 6 child obesity between 2008/09-2010/11 and 2017/18-2019/20 in all wards in Didcot has remained similar.

6 Other - house prices and commuting data

Median house prices are very dependent on the mix of housing sold (detached, semi-detached, terraced, flats). Looking at individual housing types gives a more comparable trend.

Over the past 5 years (year ending September 2015 to year ending September 2020), median prices for semi-detached housing in Didcot increased in line with the South Oxfordshire district rate.

Figure 15 Median price paid for semi-detached dwellings to year ending September 2020 – Didcot wards

Travelling to work

The travel to work data in this section is for the areas covered by Middle Layer Super Output Areas 009,010,013 and 014 (Didcot).

According to the 2011 Census travel to work statistics, there were 14,207 people living in Didcot (MSOA 009,010,013 and 014) in employment the week before the Census.

Of these, 5,050 were living and working in Didcot (including working from home and no fixed place of work) and 9,157 commuted to work outside the town.

Two thirds of Didcot commuters travelled to work in South Oxfordshire or Vale of White Horse and a further 12% travelled to Oxford for work. Overall 85% of Didcot commuters were working in Oxfordshire. A small number (391, 3%) travelled to London to work.

The greatest numbers of commuters into Didcot from outside were coming in from Vale of White Horse (1,389), elsewhere in South Oxfordshire (808), Oxford (253), Cherwell (165), West Berkshire (141) and Reading (121)
